SUMMARY

Computer Science student at Florida International University and freelance web developer who designs, builds, and deploys full-stack applications for small businesses and organizations — from bilingual marketing sites to point-of-sale and project-management systems. Works across React, TypeScript, Node.js/Express, PostgreSQL, and SwiftUI, with a background in IT support and retail operations that keeps the focus on what users need. Bilingual in English and Spanish. Seeking software engineering, full-stack, front-end, and AI/ML internship or entry-level roles.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Swift, SQL, HTML5, CSS3
Frontend	React, React Router, Remix, Tailwind CSS, Vite, responsive and accessible UI design
Backend & Data	Node.js, Express, REST APIs, PostgreSQL, SQLite, Prisma, JWT authentication
Mobile & ML	SwiftUI, Alamofire, XGBoost, data visualization, machine learning fundamentals
Platforms & Tools	Git, GitHub, Vercel, Railway, Cloudinary, Shopify (Liquid, Polaris), Linux
IT & Systems	Technical support, hardware and software troubleshooting, network configuration, z/OS system programming

EXPERIENCE

React Web Developer · Independent Contractor / Freelance, Miami, FL — Present

- Design, build, and deploy responsive websites and web applications for small businesses and organizations, owning each project from requirements and design through testing and launch.
- Built and launched a bilingual (English/Spanish) website for a Miami-Dade plumbing company with service, service-area, and review sections, deployed on Vercel with a custom domain.
- Built a bilingual church website with sermon, event, and service-time pages, language-specific routes, and per-page SEO metadata.
- Developed ProMag, a construction project-management platform for MG3 Group with RFI and submittal tracking and contractor directories, using React, TypeScript, Express, and PostgreSQL.
- Work directly with clients to turn business requirements into features, integrate third-party services and APIs, and maintain live applications by debugging functional and layout issues.

IT Technician Intern · Miami Dade College, Miami, FL — Sep 2024 – Feb 2025

- Diagnosed and resolved hardware, software, and connectivity issues for students, faculty, and staff, guiding users through troubleshooting.
- Coordinated service tickets across technicians and support teams to improve response times and reduce duplicate work.
- Repaired desktop hardware and peripherals; installed, configured, and maintained software and equipment.
- Supported network connectivity and workstation configuration, and recommended hardware and software upgrades.

Store Manager / Web Developer · Compassion and Love, Miami, FL — Mar 2021 – Sep 2024

- Managed daily store operations, including inventory control, cash management, staff supervision, and opening and closing procedures.
- Developed and maintained the store's website and managed e-commerce sales across multiple online selling platforms.
- Implemented website improvements to increase product visibility and improve the customer experience.
- Improved inventory procedures and customer service practices to support sales growth and reduce product loss.

SELECTED PROJECTS

Compassion & Love POS System

React · Express · SQLite/PostgreSQL · Tailwind CSS

- Multi-store point-of-sale web app with camera barcode scanning, receipts, printable barcode labels, bulk CSV/Excel inventory import, and automated end-of-day register reports sent by email.

Multi-Location iOS POS App

Swift · SwiftUI · Alamofire · Keychain

- Native point-of-sale app with location and PIN-based user sign-in, cart and quick-entry keypad, camera barcode scanning, low-stock tracking, and receipt printing; credentials stored securely in the iOS Keychain.

MLB Prediction & Live Analysis Platform

React · Python · XGBoost

- Baseball analytics platform that compares team form, starting pitchers, and game factors to produce calibrated win probabilities; live in-game updates and video-based contact-quality analysis in development.

EDUCATION

Florida International University · B.S. Computer Science, Miami, FL — Expected Summer 2027

Coursework: data structures, algorithms, computer architecture, software development.

Miami Dade College · A.A. Computer Science, Miami, FL

Programming, mathematics, computer systems, and networking foundations.

University of Miami · Full Stack Web Development Bootcamp — Jan 2022

Six-month intensive program: front-end and back-end development, JavaScript, databases, and APIs.

IBM Pre-Apprenticeship Program · z/OS System Programming Certificate — Jan 2023

About 500 hours of technical training in IBM mainframe technologies and z/OS system programming.

Universidad Politécnica de La Habana · Civil Engineering Studies, Havana, Cuba — Through Jan 2018

About three years of undergraduate civil engineering coursework.

CERTIFICATIONS

JavaScript Algorithms and Data Structures — freeCodeCamp, Jun 2020

Scientific Computing with Python — freeCodeCamp, Feb 2020

VOLUNTEER

Web Developer Volunteer — VOUS Church

Supported website content, functionality, and online user experience for church projects.
